## Principles & Practice of Maggot Debridement Therapy

### Workshop Details:

The BioTherapeutics, Education and Research Foundation is sponsoring the first maggot therapy workshop, to take place on Saturday, January 29, 2005, in Costa Mesa, California.

Attendees will learn how, when, and why to use maggot debridement therapy effectively for their patients with non-healing wounds. Participants will have the opportunity to practice applying maggot dressings on mock patients, will learn what other dressing materials work well with maggot dressings, and learn how maggot debridement therapy (MDT) can be integrated successfully as an adjunct to conventional wound care. Attendees can also tour the University of California Medical Maggot production facility, located nearby.

Surgical Maggots - Lederle; 1934 JAMA advertisement

### Schedule:

- 8:00 Registration opens
- 9:00 Welcome
- 9:10 Wound Healing and Non-Healing
